# Powering the Connected Dealership Experience

## Innovate with new technologies to exceed business outcomes without network migration disruption

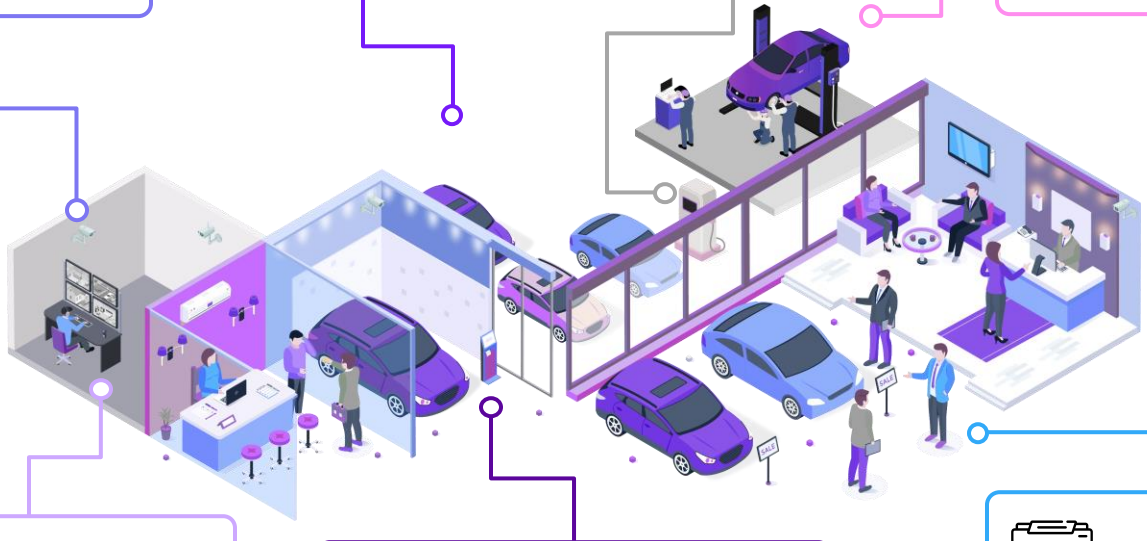
Today's dealerships run on always-on connectivity, from the showroom to service operations and the lots. As device counts and customer expectations rise, the network becomes the foundation for faster sales cycles, smoother service, and safer environments.

**Security and Surveillance**
Support always-on monitoring and safer facilities without overwhelming IT teams with manual configurations and troubleshooting.

**Lot, Inventory, and Mobility**
Enable real-time inventory visibility and smoother handoffs across the lot, showroom, and back office.

**EV Charging and Future Services**
Prepare for higher power and connectivity demands that come with new customer services like EV adoption.

**Service Bay Operations**
Keep techs productive with dependable access to apps and systems, reducing bottlenecks that slow throughput and revenue.



**Back Office and Critical Systems**
Protect business critical operations with segmentation and resilience, so downtime doesn't derail sales or services.

**Sales Floor Digital Experience**
Deliver consistent, modern in-store experiences while keeping devices managed and secure across changing promotions and traffic.

**Showroom and Guest Wi-Fi**
Fast, reliable connectivity that keeps customers engaged and enables sales teams to demo, quote, and close deals without delay.
